A division of

Check that your loved ones are fine, 24 hours a day.....

Everyone values their independence as they get older. Home is an important part of wellbeing – one of the best things you can do for a parent or for any vulnerable person is to support them as they stay where they want to live.

With that support can come worry, but one thing at least is now much easier to deal with. You don't have to get in the car to check that someone is all right. Even if they don't answer the phone, you can quickly make sure that everything is still fine.

Carewatch lets you use the internet to check that someone is safe, wherever you are and at any time of day. It works with any internet connection, including many compatible mobile phones and it's password protected so that access is restricted to you.

- Reassurance for them and for you
- Simple access, 24 hours a day
- Password protected connection
- Research and market tested

“Because I travel for work, Carewatch has made a big difference. I can check on my father at times when I know he’s at risk, like after he’s gone upstairs at night.”

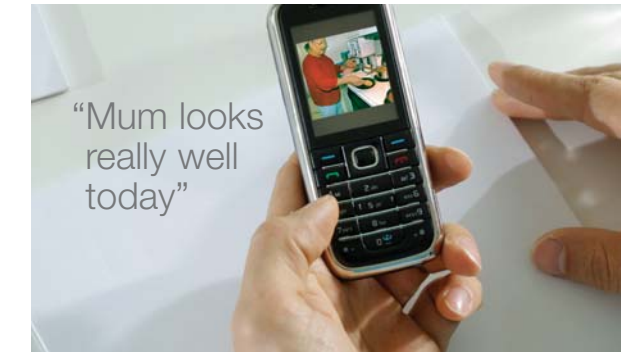

“Using my mobile* to check on my Uncle is great, especially when he doesn’t answer the phone, or left it off the hook. 9 out of 10 times he’s fine, but it’s great to see him and know for myself.”

* Compatible mobile phone with internet access

Talk to us today about the package you need. Installation is quick and simple, with little disruption or fuss and prices start from £495 supply and installation with £7.95 per week for 12 months maintenance. *All prices are plus VAT.*
